How is the test scored?

Our scoring model uses a mix of AI technology to measure accuracy, and humans to measure real-world communication skills in the workplace and beyond.

Using each scoring method where it works best means we can provide accurate results within 24 hours - much faster than traditional English speaking tests and exams.

Our scoring model is built by expert examiners using thousands of test responses from real English speakers with a variety of accents. We then use AI technology and the grades from real people to match the experts. Controlled studies show that our scoring performs as well as a human examiner.

In your certificate, you will receive an overall score, as well as individualised scores for:

Pronunciation - how you speak and stress words

Fluency - how you speak whole sentences

Communication - how clear and easily understood your speech is and how well you completed the tasks
