Your EnglishScore explained

How is the test scored?

The EnglishScore Speaking Test is designed to be an accurate, reliable measure of a test taker's speaking ability in the global workplace. To achieve this, we use AI grading to calculate a score that reflects how well a test taker can communicate in a range of different contexts, including personal, public and professional situations.

Part 1 Read Aloud

Part 2 Listen and Repeat

These two parts are assessed for pronunciation and fluency.

Part 3 Answer Questions

This part is assessed for communication.

Using AI powered scoring means we can provide accurate results within an hours – much faster than traditional English writing tests and exams.

On your certificate, you will receive an overall score, as well as separate scores for:

Pronunciation - how you say and stress words.

Fluency - how you say whole sentences.

Communication - how organised and easily understood your speech is and how well you completed the tasks.

Understanding your EnglishScore

You can score up to 599 points on the Speaking Test. Each hundred-point band on the EnglishScore scale correlates to the international standard Common European Framework of Reference for Languages

(CEFR) . CEFR is used to describe language proficiency levels. There are six main levels, from A1 to C2, ranging from beginner to advanced. The EnglishScore Speaking Test assesses from A2 to C1. The EnglishScore point-based scale helps you to understand your proficiency within a CEFR level.

Tip!
